

Identification Lab

**Glue this side down
In your notebook.**

Procedure:

1. Choose a mineral sample.
2. Go through each test and record observations.
3. Once all the tests are performed, return the mineral sample and choose another one.
4. When all the mineral samples have been tested, use the mineral identification chart to determine the name of the mineral.
5. Record findings in the first column of the data table.

MINERAL NAME	MINERAL ID #	COLOR	STREAK	HARDNESS	LUSTER	CLEAVAGE/ FRACTURE	SPECIAL PROPERTIES
	1						
	2						
	3						
	4						
	5						
	6						
	7						
	8						
	9						
	10						
	11
